

As nurses and technical professionals at UVMHC we have the benefit of working under a union contract. **We support our imaging technologist colleagues** in their efforts to organize a union. **We all deserve the right to negotiate as equals with our administration over workplace safety, improved patient care, wages, benefits and working conditions.**

We call on the **UVMHC administration to remain neutral** regarding the Imaging technologists' campaign to join us as members of the Vermont Federation of Health Professionals and to **extend the terms of the Technical Professional contract immediately to the Imaging Technologists.**

Fear and intimidation have no place at UVMHC. Management must refrain from attempting to influence technologists, and it is **unacceptable to divert healthcare dollars into an anti-union campaign.**

**IN SOLIDARITY,**
